**About my rusting vito again ☹**

Hi From Denmark

I'm sorry that I have to write to you again but it seems that writing to DaimlerChrysler Danmark AS and P.Christensen, 6000 Kolding has no meaning. I have written both of them 3 letters the : 11/5-06, 26/06-06, 19/7-06 but without any answer. The problem seems to be that they don't want to answer me the simple question : if they find it ok when a car that cost about 44.000 EUR and are between 4 – 6 years old and did run about 60.000 – 80.000 Km is rusting so much as mine is, please look at [www.pisbil.dk](http://www.pisbil.dk) there you can see the pictures of my car.

I think that big firms like Mercedes at least could send back a answer when there customers ask them, I even send a envelope with a stamp on and paper so that it will not cost them any money sending the letter back to me, but still no answer.

After I made this site [www.pisbil.dk](http://www.pisbil.dk) I'm talking with a lot of people and it seems that many of them that has a Vito has the same problems with rust as I have, but they get help from Mercedes in Denmark.

Anyway I believe in that you in Germany has the gods to help me so please see what you can do the number on the car is : 638094 13 288557. If you need more info you are more then welcome to contact me !

Regards

John Hansen
